|          |                                                                                                                                                                                                                                                                       |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| METHOD 2 | METHOD 2: The shipper has obtained the VGM by determining and documenting the weight of all packages (including dunnage, securing material and packing materials) and adding the tare mass of the container. All weighing equipment used is certified and calibrated. |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| Item     | Description                                    | Pkg Type | No. Units | Gross Weight (KG) |
|----------|------------------------------------------------|----------|-----------|-------------------|
| 1        | Electronic Components - Printed Circuit Boards | Case     | 14        | 2,275.0           |
| 2        | Electronic Components - Printed Circuit Boards | Crate    | 4         | 503.6             |
| 3        | Chemical Compounds - Industrial Solvents       | Pallet   | 4         | 3,883.2           |
| 4        | Paper Products - Packaging Cartons             | Cylinder | 13        | 9,461.9           |
| 5        | Chemical Compounds - Industrial Solvents       | Cylinder | 15        | 4,955.6           |
| SUBTOTAL | All Cargo Packages                             |          |           | 21,079.3          |

| VGM CALCULATION | COMPONENT                                                  | WEIGHT (KG) |
|-----------------|------------------------------------------------------------|-------------|
| Step 1          | Sum of all cargo package weights                           | 21,079.3 kg |
| Step 2          | Packing materials (pallets, strapping, dunnage, void-fill) | 206.5 kg    |
| Step 3          | Container tare weight (45'HC, ISO L5G0)                    | 4,800.0 kg  |
| = VGM           | VERIFIED GROSS MASS (Step 1 + Step 2 + Step 3)             | 26,085.8 kg |

|                                                                                                                                        |                                                                                                                     |
